The Revamil brand is registered for a broad spectrum of wounds.

Oswell Penda Pharmaceuticals are the UK distributor for the Revamil product range.

opp-uk.com

Revamil wound dressings consist of 100% pure medical grade honey with a high enzyme content and a low ph of 3.5. Revamil wound dressing are not contra-indicated for drawing or stinging and each dressing has a measured amount of honey to support wound healing whilst helping to prevent maceration.

Revamil®

Revamil wound dressings do not contain any pesticides or parabens and the same quality can be replicated consistently. The pliant poly-acetate guarantees the slow release of the honey into the wound bed.
